Portable UV-C Sterilizer

UVC LED Ultraviolet Light Sterilizer kills up to 99% germs

Use it anytime, anywhere !!

Kids Toys   Toothbrush   Tableware   Smart Phone

Feeding Bottle   Banknote   Shopping Cart Handle   Door handle

Why UV-C LED?

• Fast disinfects the germs and bacteria, sterilization rate 99%.

• UV-A+UV-C Dual chips LED beads are packed with high-purity crystal to ensure high transmittance.

Quality and Durable

• UVC LED is safe and durable to sanitize up to 60,000 times, LED life is 15,000 hrs.

• Built-in 700mAh lithium battery. It just takes 1.5 hours to recharge and it can be used 150 times/30s after being fully charged.

Smart operation

• 30s Intelligent timing sterilization.

Safety

• 99% sterilization rate approved by third-party laboratory.

Lightweight

• 68g small, compact and travel size to carry anywhere.

Specifications :
Battery : Lithium Battery 700mAh
LED Beads : UVC + UVA Dual Chips
UV-C Power : 10mW
Size : 26.5 (D) mm x 94.55 (L) mm
Weight : 68g

UV-C Technology

The Portable UV-C Sterilizer is designed to fast kill 99% of germs to your personal belongings and household items, such as smart phones, door handle, kids toys and more.

This is UV-C LED technology, which is UV-C light in wavelength between 260 and 280 nanometers that damages the very DNA or RNA of microorganisms such as bacteria/viruses/mites and kills off germs in a matter of minutes to achieve the effect of sterilization for health.

UV Light   Visible Light   Infrared Ray

UVC   UVB   UVA

200nm   280nm   315nm   400nm   780nm (Wavelength)

UVC LED Effective Sterilization Range 260nm-280nm

UVC light destroyed the DNA & RNA code of pathogens physically.
